

### Budget

Overall structure	How is the overall health budget structured?
Other descriptors	How responsive is the budget to health priorities?
Legal/regulatory/policy basis	Is there a legal or regulatory basis for how budgeting for health should occur and/or priorities established?
Fragmentation within process	What are the major health budget centers (on and off budget)?
Costing	Do costing tools align with budgeting approach?
Other tools and data	How well are other priority setting processes accounted for in the health budget?

### Decentralization

	What is the jurisdiction of local government have in administering health budgets?
	How flexible are subnational budgets in terms of what can be included?
	Is there a legal or regulatory basis that dictates the role of lower administrative levels in setting health sector priorities?
	Are there multiple plans or strategies at the subnational level that drive resource allocation?
	Are these plans costed?
	What other tools and evidence are used to guide priorities?

Health systems and financing	Benefits package	External resources
How would you categorize the domestic health system financing structure?	How is/are the public benefits package(s) structured?	How would you categorize the partner landscape in terms of financial contributions to health?
How does the majority of the population access services?	What is included in the benefits package? How often is it reviewed?	What is the % of CHE that comes from external resources?
Is there a legal or regulatory basis that dictates how resources should be allocated against health sector priorities?	Is there a legal or regulatory basis that dictates how resources should be allocated against the benefits package?	Is there a legal or regulatory basis that dictates how external resources should be allocated against health sector priorities?
Are there multiple strategic plans for both the budget holder and different programs funded by that budget holder? [eg. TB, HIV etc.]	Outside of the main package, are there other packages specified for specific programs?	Are external resources aligned to priorities of the major budget holder?
Are these plans costed and/or linked to a health financing strategy?	How is/are the benefits package(s) costed?	Are the costs of donor programs transparent and available to the government?
What other tools and evidence are used to guide priorities?	What other tools and evidence are used to guide priorities?	What other tools and evidence are used to guide priorities?

 Budget

<p><b>Fund allocation</b></p>	<p><i>Do resources flow according to determined priorities?</i></p>
<p> Budgeting</p>	
<p> Decentralized priorities</p>	
<p> External resources</p>	
<p> Benefits package</p>	
<p> Health or Program Plan</p>	
	<p><i>What institutions or stakeholders are involved in allocating funds according to these priorities, and what methods do they use?</i></p>
	
	<p><i>How and how frequently are resources allocated?</i></p>
	
<p><b>Payment</b></p>	<p><i>Who receives funds: Do they have flexibility to reallocate funds according to need?</i></p>
	
	<p><i>How are funded priorities paid for?</i></p>
	
<p><b>Assessment</b></p>	<p><i>How are funding flows tracked against priorities?</i></p>
